1.2 The scope of economics 2  
1.3 Allocating resources 3  
1.4 Adam Smith and the invisible hand of free enterprise 3  
1.5 Economic performance: an overview 4  
1.6 Prospectus 9

## Chapter 2: Production possibilities
2.1 Overview 1  
2.2 The production transformation curve 1  
2.3 Opportunity cost and the MRT 3  
2.4 Linear programming 7  
2.5 The gains from trade 10  
2.6 Methodological note 15  
Appendix 2.1: Alternative proof of a fundamental proposition 16

## Chapter 3: Supply and demand: where do prices come from?
3.1 Overview 1  
3.2 The Middletown housing market, a parable 2  
3.3 The Econoland corn market 5  
3.4 Demand and supply curve shifters 10  
3.5 Elasticity 13  
3.6 Some Applications 18  
3.7 Foreign exchange rates 21  
3.8 Taxes 26  
3.9 Markets versus the ballot box 33

## Chapter 4: Maximizing satisfaction
4.1 Introduction 1  
4.2 One good and two consumers 2  
4.3 Two goods and one consumer 8  
4.4 Indifference curve applications 17  
4.5 The box diagram – two goods and two consumers 23  
4.6 Summary and conclusions 27  
Appendix 4.1: Lagrangian Multipliers 29

## Chapter 5: The business enterprise
5.1 Introduction 1  
5.2 Organization of the firm 2  
5.3 Profits and accounting 7  
5.4 The technological constraint 13  
5.5 Maximizing profit 18  
5.6 Management science illustrated: OLS & JIT 25

## Chapter 6: Market Structure
6.1 Overview 1  
6.2 Competitive markets 2  
6.3 Monopoly Versus Competition 12
